- 1.5-inch high-definition colour screen
- Up to 13 hours continuous battery life
- Built-in 3500mAh battery
- Rapid charge — 9 minutes charging for 2 hours recording
- H.264 video format
- Full-speed Type-C 2.0 USB interface
- Custom logo supported

Product Overview:

The H30 is the flagship of the Videoline body-worn range. It records at 1440P through a 175° lens — the highest resolution and the widest field of view in the range — which suits crowd management, vehicle interiors and any situation where a single officer has to cover a wide scene without repositioning.

A 3500mAh battery gives up to 13 hours of continuous recording, and rapid charging returns two hours of recording from a nine-minute charge, which allows a unit to be turned around between shifts rather than held back. Video is recorded in H.264.

High-definition infrared night vision, motion detection and red and blue warning lights are fitted as standard. The H30 ships with both waist and shoulder clips plus a cloth carry bag, and custom logo marking is available.

Specification:

Model	H30
Type	Body-worn audio and video recorder for law enforcement
Maximum Resolution	1440P
Video Format	H.264
Field of View	175° wide angle
Night Vision	High-definition infrared
