

1296P Body-Worn Law Enforcement Recorder **Model: H50C**

Features:

- Maximum 1296P recording resolution
- One-button start recording
- Audio recording begins automatically at power-on
- 135° wide-angle lens
- Motion detection
- 1.5-inch high-definition colour screen
- Up to 10 hours battery life
- Built-in 1500mAh battery
- Full-speed Type-C 2.0 USB interface
- Custom logo supported
- Collection station management software can be included

Product Overview:

The H50C is the entry model in the Videoline body-worn range, intended for large deployments where the requirement is straightforward, reliable capture rather than a full feature set. One button starts 1296P recording, and audio capture begins automatically when the unit is switched on.

A 135° wide-angle lens and motion detection cover routine patrol, counter and gatehouse duties, and the built-in 1500mAh battery supports up to 10 hours of use. The unit is supplied with a waist clip as standard.

Collection station management software can be included, and custom logo marking is available. Note that infrared night vision and warning lights are not fitted to this model; specify the H80A or H30 where those are required.

Specification:

Model	H50C
Type	Body-worn audio and video recorder for law enforcement
Maximum Resolution	1296P
Video Format	MOV / MP4 (utilizing standard H.264 video compression for optimal processing)
